

## semiCustomFrontPage

### Semi-Custom Attorney Web Site Development

A complete cost-effective solution:

- A web site designed that is unique to you, without the high price,
- A web site developed with the bells-and-whistles to stand out from the competition,
- A web site you can easily update, and
- Enough Search Engine Optimization (SEO) to beat out the competition

### Semi-Custom Attorney Web Sites

Attorney web sites have been built like houses: either with a cookie cutter template tool, or custom built for big bucks.

To make matters worse, without an expensive Search Engine Optimization (SEO) campaign, web sites may appear down on page 50 of the search engine results - useless for new clients to get your help.

There had to be a better way.

Legal Firm Web Host recognized the problem. After over two years of researching technologies and processes, we have come up with that better way. We have found that a Semi-Custom Attorney Web Site solution was the answer.

The Semi-Custom Attorney Web Site solution offers:

- A unique attorney web site designed for you, like a high end custom home,
- An attorney web site developed with the bells-and-whistles to impress and stand out from the competition, but without the expense,
- An attorney web site you can updated, and
- Enough Search Engine Optimization (SEO) to put you ahead of most attorneys.

The Semi-Custom Attorney Web Site development process saves you time by providing suggestions, recommendations and choices. You are not painted into a corner with a couple of choices from a template tool, nor are you starting with a blank page and have to think of every detail yourself.

It is very exciting stuff!
