

Semi-Custom Web Sites

A complete, cost-effective legal firm web site package:

- A legal firm web site design that is unique, but without the high price,
- A legal firm web site developed with the bells-and-whistles you need to stand out from the competition, but without the high cost.
- A maintainable web site you can update the content about your legal firm, and
- Enough Search Engine Optimization (SEO) to beat out the competition

Web sites have been built like houses - with a cookie cutter template tool, or custom built for big bucks. Legal firm web sites are no exception.

To make matters worse, without an expensive Search Engine Optimization (SEO) campaign, your legal firm web site may appear down on page 50 of the search engine results - useless to people who need help, your help.

There had to be a better way.

Legal Firm Web Host recognized the problem. After researching technologies and processes, we have come up with that better way. We have found that a Semi-Custom Legal Firm Web Site solution was the answer.

The Semi-Custom Web Site solution offers attorneys:

- A unique web site to complement the character of your practice,
- The bells-and-whistles you need to stand out from the competition without the expense,
- A maintainable web site, where you can add or change with the latest information about your firm, and
- Enough legal firm Search Engine Optimization (SEO) to be found by those clients searching for help.

The Semi-Custom Web Site development process focuses your time by providing suggestions, recommendations and options. You are not painted into a corner with a couple of choices from a template tool, nor are you starting with a blank page and have to think of every detail yourself.

It is very exciting stuff!
