### OnRamp Lawyer Web Sites

OnRamp provides the easiest and least expensive solution for lawyers to have a professional email and business card on the internet.

On Ramp: Cheap Lawyer Website and Email

OnRamp provides the easiest, inexpensive website and email solution to providing lawyers with a professional image.

As a lawyer, if you are just looking to have a web site with your contact information and a professional email address (not "name19154@ispCo.net"), then this is the solution for you.

OnRamp includes:

- Domain Name (e.g. www.yourNameLawPractice.com)
- 1 email address (e.g. \n yourName@yourNameLawPractice.com This e-mail address is being protected from spam bots, you need JavaScript enabled to view it )
- 1 page web page created for your legal firm based on one of our business card templates

Your business card on the internet, with a professional email address for your clients and prospects to contact you.

After all, as a lawyer, you do not have clients calling your neighbor for you. Why have clients email your ISP (e.g. \n yourName@yourISP.netThis e-mail address is being protected from spam bots, you need JavaScript enabled to view it ).

While this website solution doesn't have the internet working to get you new clients, setting clientsexpectations or answering questions, it is an extremely inexpensive solution to giving your business card the look of a serious professional. Looking for cheap? This is the answer.

Another type of lawyer who selects OnRamp, are lawyers just starting out. There are so many things needed to get done to get a firm off the ground, you have to prioritize your time. What some people do is:

- Register your firm's name (including deciding on the legal structure of the company and any needed trademarks).
- Order Telephone Service so clients can call you,
- Order OnRamp to get the domain name and email address squared away.
- Order Business Cards - because you need a telephone number and email address first.
- Now work on all the other things that need to get done to make a new firm happen - especially getting revenue and cash flow moving in the right direction!
- Create a real lawyer web site that will be used to get those new clients contacting you, setting expectations, providing quality service to customers without you constantly being on the telephone, etc.
